# **SITUATION SUMMARY**

## **NORTHERN OPERATIONS FIRES**

### **Washington, Vegetation Fire, Alpine County**

#### **Evacuations/Shelters**

- Per the Cal OES Law Duty Officer, there are no evacuation orders for this fire at this time, with the exception of the campgrounds along the road closures, which have been evacuated. S.O. personnel made advisory notifications via Reverse 911 to the residents of Markleeville in the event an evacuation becomes necessary. Currently, there have been no evacuations in the town of Markleeville.
- ACSO has evacuated the following areas: Carson River Resort, Silver Creek Campground and area's below, including Centerville Flat, Wolfcreek Meadows, Hwy 4 along the East Fork of the Carson River and other dispersed campgrounds.
- Alpine SO did a precautionary notification of the Monitor Pass area.
- Per the Cal OES Inland Region Duty Officer, there are no open shelters. A shelter site has been identified if needed.

#### **Road Closures**

- Alpine Sheriff's Office advises the Fire has jumped Hwy 4.
- Per the Department of Transportation, State Route (SR) 4 is closed from Ebbetts Pass to the Junction of SR 89.
- SR 89 is closed from the Jct. of US 395 to Laramie St. in Markleeville.

#### **Medical/Health**

- There is currently one impacted CDSS community care licensed facility, ROP Qualifying House Freel, 20545 State Route 89, Markleeville. Affected population: 3
- Per National Weather Service Reno: Plume forecasts for the Washington Fire indicate smoke moving east/northeast through this evening before smoke settles into the valleys overnight. Communities near the fire and downstream such as Smith Valley, Yerington, and Fallon are most likely to be impacted with reduced air quality today. Assuming continued fire activity Tuesday, winds will be light becoming northeast by the late afternoon, taking the smoke slowly west into California. Winds are forecast to remain easterly Wednesday and Thursday as well, though there may be brief periods where westerly afternoon winds will kick in and bring some smoke back into western Nevada.

#### **Infrastructure/Utilities**

- Per CUEA no threat to the power grid or transmission lines. CUEA will monitor.

#### **Missions**

- **2015-Inland-13708:** Request for (1) Air Monitor to Alpine County.
- **2015-SREOC-13728:** Request for (1) Air monitor to northern Mono County

- DTF Drought Update for 06/23/15 is attached

## **Weather of Concern**

Hot weather returns late this week, with above normal temperatures by Tuesday and widespread triple digits in the Sacramento Valley by Thursday. The hottest day of the week is expected to be Friday, gradually cooling over the weekend. A special concern for the heat is the large crowds at the US Senior Open in Sacramento. Moisture spreading northward Friday into the weekend will bring the potential for mountain thunderstorms with limited rainfall initially. A transition to wetter storms is possible as we move through the weekend.

## **Impacts:**

- Heat-related illnesses and impacts possible to likely if action not taken
- Extra heat precautions should be made for outdoor events
- Hot and dry conditions are priming fuels for enhanced fire danger
- Initially dry mountain thunderstorms with lightning could cause fire starts

# Prepare for Dangerous Heat!

## What **Red** Means . . .

Dangerous heat like this happens only a few times a year. Impacts are likely, even for the general population, if precautions are not taken.

## What **Orange** Means . . .

Heat like this happens many times a year. It will be relatively easy to take simple precautions to keep safe.

## Advice . . .

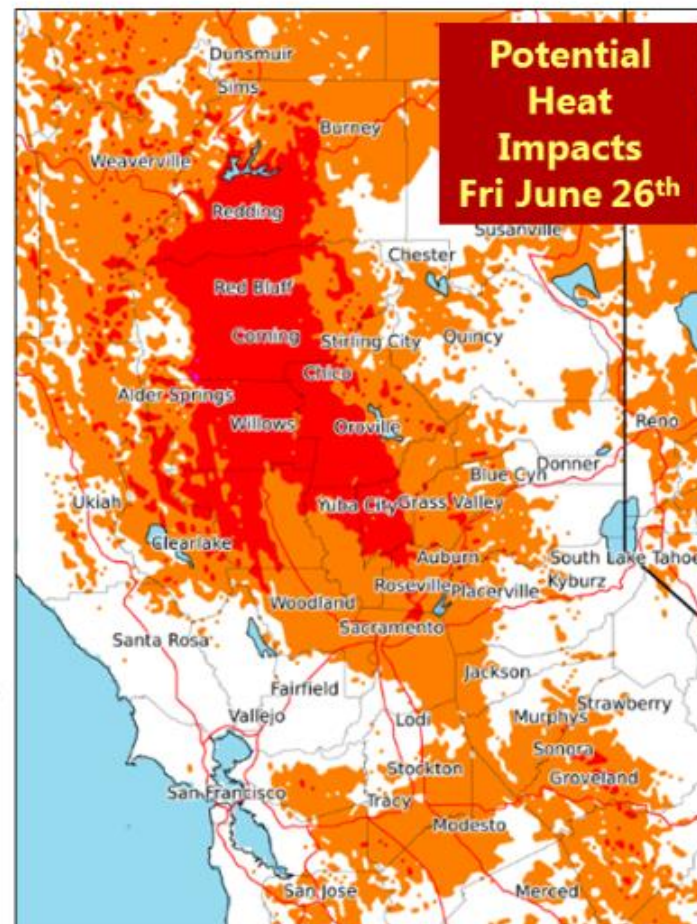

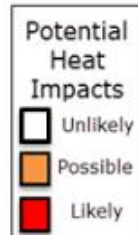

- Drink before you're thirsty
- Avoid strenuous activities
- Stay in air-conditioned areas
- Check on the heat-sensitive: (e.g. elderly, infants, pets)

## WEATHER SYNOPSIS BY REGION:

### **Northern Region**

High pressure will gradually be strengthening over the region during the next few days from the southeast with a strong increase in temperatures beginning today. Very hot and dry conditions are expected to develop with the warmest inland valleys climbing to around a range of 105-112 Wednesday into the weekend. The high will be centered over the Great Basin and Desert Southwest, and that will put a southeast to south flow over California. Some moisture will get caught up in that flow and spread northward beginning Friday. Isolated afternoon and evening mountain thunderstorms are anticipated to begin Friday. A few more daily thunderstorms are expected over the weekend, and they are all likely to be rather dry. HIGH RISK designations are anticipated for the weekend, but will not be specified until Wednesday when it is expected to be clearer when and where those conditions are most probable. The high will persist in the Great Basin into next week with more moisture rotating around it from the south over Northern Operations. Daily afternoon and evening thunderstorms are expected early next week and possibly into mid-week.

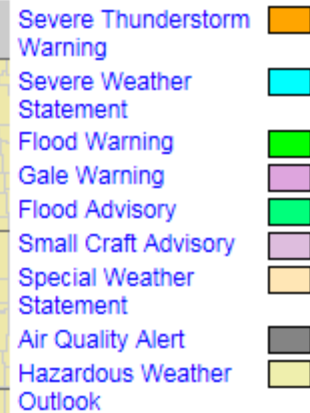

### **Southern Region**

A slow cooling trend can be expected through the workweek as a weak low pressure area forms off the coast. This will allow onshore flow to continue, leading to an expansion of the marine layer. Temperatures today will be seasonally warm with highs in the 80s in the mountains, 90s in the inland valleys and 105-110 in the low deserts. While the marine layer will keep many locations below 2,500 feet relatively humid this afternoon, the air mass over the area will be quite dry today and Wednesday. This will result in minimum relative humidity falling into the 8-12% range for 6-8 hours during the next two afternoons at elevations above 4,000 feet. Onshore flow will produce winds of 15-25 mph with gusts to 35 mph across the Kern County Mountains, the Antelope Valley and the Banning Pass today and Wednesday. Late this week, southerly flow resulting from the low offshore may import some subtropical moisture which may lead to isolated showers and thunderstorms. Cumulus buildups will be likely near the mountains by Friday. This weekend, isolated showers and thunderstorms will be possible near the higher terrain, mainly from the Angeles National Forest southward. Minimum relative will be higher this weekend and winds should be light. Temperatures are expected to continue to hover near seasonal averages through the weekend.
